Enjoy! This game is amazing. I think it's the most relaxing game ever!!! I like it in my spare time I'll take out my phone and play it. It's so relaxing once I fell asleep playing it. I think if you look into getting it you should have it so nice. It's all free, too. And the best part is I've never seen more than five extras a day. It's not like one of my other games filled with ads. I also never saw a bad addition that was just good additions. Another thing I love is that every day there's a daily puzzle. I like to play it. I have to say this game is probably in my top five games. I've been playing this game for six years I've never had any problems with it I decided to write a review because I've been stuck in my house for a while I've been playing this game like crazy. I decided to write this review because all these years of acting I didn't say anything about it so I just want to say free flow you've done an amazing job in this game. I love it!! Thank you so much for creating this game I hope you can put my review on others to read and find out how good this game is! And I just wanted to say that you definitely need to get this game !!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! Free Flow is a game where you have to connect lines. You have a quantity of moves and it shows the best amount of moves to this level. What makes this game great is that it's common sense and common sense. Also, it's the fact that it helps your brain really think which two lines should go where so the other lines connect. It's also satisfying to see them connect. Another thing I like is how they always get a harder level by level and scoreboard by scoreboard. I like the idea of them creating everyday challenges. The game is really perfect. It's very creative and really makes your brain think. It's like a fun, creative mind game and I like the idea of it. One thing that free flow needs to add is a challenging level where you have a certain amount of time to connect 20-30 lines. Another thing should be proficient in other players to see who can connect the lines or complete 1 complete scoreboard faster. These two game modes should be called expert level and competitive level. I hope free flow can use one of my ideas. Therefore, this game is great but can use some game modes. - Thanks again for reading this. Free streaming is a bit easy for the first few levels, or at least I found it so. Around level 7, it gets very interesting and challenging. Even if you find the first few levels a little too easy, keep going! By the time you reach 7x7 squares, you can see it starting to protect the pace in an attempt to wrap your brain around it. By the time you get up to 10x10 squares, you see why even highly intelligent people give up here. These puzzles with higher numbers of squares require a high level of spacious conceptual thinking. I love the challenge, but finding it could be Frustrating. When I get to the puzzle that really burdens my brain, I go back to working some puzzles at a lower level or even a level on a lower number of squares. Trust me, if you level 130 squared 12x12 and you go back to the puzzle in 11x11 squares, you won't look at it saying I remember it. Having worked on some of the less taxing puzzles, I can go back to a level that frustrates me and see it in a new light and solve it and move on.
